You go, zslots, whoever you are. Cash those chips.\$545 for an "S" model!; maybe the original box and accessories make it worth it? I keep an eye on III sales at Audiogon and once in awhile on E-Bay. Amazingly, I have yet to find a single offering of one with the silicone damping trough like mine. Don't know how you could live without it, tried it both ways, but I guess what you don't know...
