I'm a big fan of tape, although I sold my last reel to reel a few years ago. I still use a good cassette to record my band rehearsals with. I use a Tascam 133. It has a very good sound and three channels, plus two speeds (1 7/8 & 3 3/4). I use a pair of Shure condenser mics in ORTF configuration about six feet in front of the band and an old Shure 55s for the vocalists, just to be able to get vocals heard above the all acoustic instruments. The old cassette can sound pretty darn good!Dave
