Wayne,Here's the unit I won.

<http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=3764933829>The nice thing about this unit is it has high speed option (3 3/4 IPS) and a loop for whatever outboard noise reduction I want. Also, the 3rd channel. This works great use as a vocal close-up mic channel. I use it on a mic that is close to the vocalist's mouth, then blend it into the rest of the music on the other two tracks, thus making the vocals less likely to be lost in the rest of the music. It works well for this. Very rugged and pro quality throughout.Dave
