Subject: quarter inch tape deck question

Hi!I hope I may find some help here... I am looking for some info on how to transfer rather antique (late 50's, early 60's) home recording, consumer-level 1/4" reel tapes to digital. I need to find a deck that will accomplish this. At this point, I need to find a tech info on what machine to look for. If any of you audiophiles could point me in the right direction (more appropriate forum or info), I'd appreciate it big time. Thanks!Rad
