Dear Steven, hello, WOOOOW, sounds like you are The Master of Pioneer RT909!! I read the whole thing and sounds like you are the one who can help me. Problem with my unit is, it was working flawless, 2 days ago after I finished recording one complete 10" reel, all of the sudden it stopped!! No play either way or in record mode, NO MOVE, but it fastforward and rewinds without problem, also when I turn it on, I think, I smell something like burning!! You know the smell of the wire burning! You are in NY and me in LA, CA., what I have suppose to do?! Happy Holidays, Minas Akopians
