I'm using a 3950 with the Swenson mod and it sounds too good to be a $48 player. It replaces a Phillips SACD 1000 that died three months out of warranty. You gotta love this hobby. See the picture at http://wardsweb.org/LSB/05_15_04/A33.html Mine is the one with the black feet. John Swenson's 3960 is the one with the cheap floor tile glued to the top of the cover.
