Subject: Transistors/ cross referencing Posted by Manualblock on Thu, 09 Dec 2004 00:56:35 GMT View Forum Message <> Reply to Message

Anyone know how to cross reference Fairchild Semiconductor TO 92 and TO 220 transistors. Also how to substitute Mosfets for either one of those? Thank You in advance. The tag numbers are BC 549/559. Mouser will not sell one. I have all the specs. What are the most relevant and which can be exceeded.
