Subject: One More Time - What's an LPF? Posted by FredT on Thu, 15 Sep 2005 23:55:20 GMT View Forum Message <> Reply to Message

What are the white rectangular parts near the output jacks? They look like rectangular metallized poly Wima-type caps but I don't recognize the information printed on them. Are they the "Full Balance LPF using discrete transistor components (four LPF)" described in the DiyClub DAC-68 site? What is an "LPF".http://www.liteaudio.com/2005-1-22/2005122154743.htm
