Subject: Mic Preamp Posted by Crystal on Tue, 11 Sep 2007 02:35:58 GMT View Forum Message <> Reply to Message

Ok so I'm thinking about putting a studio together and right now I'm looking into a microphone preamp. The reason why I'm thinking I need this is because if I were to plug my microphone into my computer's soundcard or even my mixer, the quality would be horrible. Is it mandatory to get a preamp for your mic? I don't really want to buy a big bulky one because my home studio is going to be small.
