tweaking my cd player its a rotel 1072 (\$600) and morrow audio has a mod for \$250 which can be A/B to hear the improvements---I am tempted from time to time to buy a used Meridian or Sony on Audiogon to hear what a \$2-3K player would sound like --my non audio nut friends think this is dumb--as they say "wake up! Its digital a \$150 Phillips is the same signal as my \$ 600 player there is no diff!" Jim
