I'm a low power sort on all counts. ;-)  
Projects take forever because I acquire the background needed pretty slowly. I have a pair of Fostex FE127's (4.5 in) on hand. They are in a some old Speakerlab BR cabs at about 2.5 cu. ft. I have them set up by the computer here and everything runs through a Yamaha RP U100 which is a small receiver with a USB connection. Power is 30 watts per channel.
