Wayne, The event was a lot of fun. I enjoyed it. I must admit that I missed not being able to spend time listening to the various speakers. There were only a handful that I took the time to listen to and enjoy during the day. [www.audioDIYcentral.com](http://www.audioDIYcentral.com) has become the "official" website for the DIY events and the event should be posted there with pictures soon. I didn't have time to take any so I requested anyone with pictures send them to Jim Salk, the web master. Jim
