Subject: A follow-up please, Mr. President? Posted by wunhuanglo on Sun, 05 Dec 2004 20:36:04 GMT View Forum Message <> Reply to Message

Thanks Wayne. I appreciate your insights on this.Would you think that cancellation would be the culprit even if I measure well at the listening position? Would it then be a matter of specific frequencies being lost when being reproduced by both channels? Something not revealed when measuring with pink noise?TIA
