Dear Forum,I have recently restored a rather badly treated pair of these speakers. My interest stemmed from my experience with a pair of NS-690 series 2 (also a fine speaker). I have had a serious interest in audio for at least 30 years and think myself pretty experienced. These speakers are amazing. They are so completely musical and engaging I just cannot stop listening to them. I have played them at a reasonable volume and they just don't stress or become unbalanced in anyway. The mid range is absolutely one of the best I have ever heard. My foot seems to be tapping all the time. I highly recommend that you all seek out a pair. It's a shame the cabinets are so tatty around the edges. I was wondering if anyone has attempted to use the same drivers in a different enclosure? Many Thanks Howard (sunshine coast queensland)
