I would prefer small compact speakers that: (1)delivers enough good quality clear loud sounds for a motel room...one that kicks out some superb sounds (2)That's under \$50 (3)that is small and compact so that I can easily pack it in my laptop's case ----- Also: Are the wooden Mini Travel Speakers at this site: <http://www.iwantoneofthose.com/travel-speakers/index.html> ...the same as premiartek's Sound Pod Fold Up Amplified Portable speaker? If Yes, what do you think of them as small quality speakers? ----- What do you think of these 2 speakers: -Logitech R-10 Multimedia Speakers \$29 at futureshop? 2 x 2 Watts -Creative Labs Vivid 80 Speakers (MF5005) Thanks
