Ok heres the prob.. i just got new logitech x-530's hooked em up correctly using realtek ALC850 audio drivers. i then notice im only getting sound from rear speakers and centre/subwoofer nothing from front right and left. im using an onboard sound card on the asus A8N5X motherboard. ive checked all the connection to make sure there not loose and are in the correct spots. also i get no sound at all threw youtube witch is odd, also ive connected the 530's to my dvd player and tv and get blasting sound from all speakers, why cant i get all of em to work on pc.
