Subject: Which Speaker?!?

I was hoping to find some input to help with choosing speakers for a small church building. The building is about 1500 sq ft (appr 40x40) with a pitched ceiling 10' on the sides and 15' in the center. The speakers would be hanging right at the 10' ceiling on the side.The mixer will be a Mackie TT24 Digital Live Console Factory pushed by a Peavey PowerMode 4 Power Amplifier.The Speakers I've looked at that I feel will look best in our auditorium with such a low ceiling are:1. Bose Panaray 402 II Loudspeaker(White)2. TOA Electronics HX-5W Variable Dispersion Speaker White3. TOA SR-S4S4. OAP UBF-822I can't find any kind of real independent reviews on any of these. If anyone has any suggestion on these or any other similar speakers, I would be very appreciative. Thanks.Steven
