Hi guys. I was wondering if we can get a list of tweaks together for some Altec speaker systems...specifically the Valencia's (or others too) My brother has a pair...and we're going to be looking into redoing them. I'd love to hear any suggestions you have! suggestions for the mid-horns...cross-over suggestions...and...We'd like to redo the cabinet, would it be advised to make the cabinet larger? Please keep in mind I'm still a newbie speaker maker...so, if possible, be as in depth as you can. thanks! enjoy the music!
