... my Bob Brines' TQWT's loaded with R/S 40-1354's. They don't have lots of bass, but they're nice and smooth and relaxed and I listen to them quite a bit with my Paramours.The beautiful (IMO) birch plywood cabinets were built by Mike Berg in Hudson, MA to Bob's design. There's no BSC network, Zobel filter, nor any driver treatments. The pipe is stuffed with polyester (pillow stuffing).BTW, I am "borrowing" the image from AudioKarma.org. Hope that's OK to all parties involved...
