AlsoFR,is just one of the many things to measurenow that you have a great flat responsewhy not listen to a fullrange speaker that people love,and compare it.simplicity no x over,see if it appealsA moderately flat response i want,but i dont want to sacrifice other things to get that.The listening room affects so much..Its interesting to hear...I plan on building a horn system in the future ,, up to 16khz like adrian macks.:-)Cheers!!
