I agree, Merle gets a lot of play around my system. Our current project is to organize the 13000 old country songs in a searchable database by writer, producer, weeks on the chart, years on the charts, etc... when we finish we will be able to select say, the top 40 hits of 1965 for a playlist.Yep, quite a bit of ol George. What I really need is a way to play these 78s I have sittin around. Numa
