Theres a guy down south that restores older turntables along the lines of garrards and Duals most of which will play 78's and I am pretty sure he supplies stylus's also. The prices are very reasonable, he once gave me a quote for a Technics sl 1600 in excellent condition for 125$. If you are interested I think his site is still called The Turntable Factory. Have you heard any new country that sounds promising? Organising a data base is a great idea. J.R.
