OOPS! I'm not familiar with the 2218 either. It was the 2118 as you surmised. Checked out the Eminence Alpha and Beta 10's. Both appear to have a sensitivity of 94-95 db/w/m below the raised HF area - a little low. The Altec 412 might be a candidate but I have been unable to locate the T/S parameters. The search continues.Thanks,Bob
