HI Jim,I guess we meet every couple of months, when someone gets motivated (or arm twisted) into hosting a meet. I think I speak for all when I say you are welcome to attend any of our meets! It would be cool to hear the AN dac on MArk's system, using his Meridien as transport. THat would be an all AN system, except for the transport & cables. I made changes to the review of the Fest, hope they are accurate. I will send you a separate email re: the kt-7500. Thanks in advance for helping me out with that. thanks-akhilesh
