Where are you located?I have had people visit before during the summer and one guy drove from as far as southern NJ for an afternoon/evening listening session. One guy hauled a set of speakers up and we had a great time swapping the three sets of speakers in and out of my system. Then there is my buddy up the street and we go back and forth a few times a year.If you want ot make the trip, I should have a new amp and preamp by the early summer. Any time after I replace my failing Adcom preamp would be a good time. Once fall starts, the school activities, dance lessons, and piano lessons grind starts again.E-mail me off line in June and we can see if a date and time can be worked out,Martin
