Subject: Re: This open-baffle speaker thing Posted by wunhuanglo on Mon, 05 Jul 2004 15:44:41 GMT View Forum Message <> Reply to Message

I use active crossovers (Rane), but you can calculate basic crossovers at the link below. You can use the very simple "Edge" program to come up with a baffle size and driver placement. In general you want a rectangular baffle with assymetric placement of the driver.http://www.tolvan.com/edge/ ("The Edge") Crossover Calculators
