I'm near New Orleans. If somebody wants to pick them up they can email me, but they're nothing special at all - wood grain vinyl wrapped MDF (black). Actually, I was kind of fooling around to make a point that only I got, I guess. It's just amazing to me that these two enormous, heavy, complex boxes were replaced with little H-frames and to my ear for the better. I used to wonder about the street musicians playing guitar in the French Quarter and their open-backed speaker cabs - I don't wonder anymore.
