Subject: Re: Speaker efficiency? Posted by jbarlow on Sat, 21 Aug 2004 20:28:21 GMT View Forum Message <> Reply to Message

From what I understand 50% efficiency is nearly impossible, some say fully impossible. A Klipschorn is rated 104db. The T36 rated at 108db and I'd say somewhat exaggerated at that. Either way, 106db is real damn good and can only be achieved by a very efficient bass horn.
