Now there is something about those JBL Pro drivers...A couple of months ago I listened to the most breathtaking system I have ever heard. It was made up by (each channel):JBL 2215H -63 HzJBL 2225H 63-300 HzJBL 2110A 300-800 HzJBL 2445J 800-6000 HzJBL 2402 6000-HzRoland, the guy who built this system is now in the process of going all active using the digital crossovers from Behringer. I can't wait to give it another listen and I hope Roland joins this forum soon!Cheers/Magnus
