The latest Parts Express catalog shows two 2" throat horns that look like the JBL 2380. One is a Selenium horn, PE part #264-328 (page 211). The other is a Goldwood, PE part #270-204 (page 196). Anyone have any experience with these or can offer any info about them? Are they JBL clones? close copies? not close enough? Thanks.
