Subject: Re: Tuning? Posted by adavis464 on Sat, 06 Nov 2004 14:16:54 GMT View Forum Message <> Reply to Message

You might want to get an old speaker build articals I don't remember who the author was .He had great success but he tuned his bandpass reverse Less low end wider bandwidth.he used them for pro sound.Don't get me wrong a bandpass can be tuned to sound less (one note Sounding),but everyone wanted real low bass and did not care because they sounded good in home theater use.Now days digital eq's may make all the difference in the world.I will look for the speaker builder articals over the weekend if I find them I will let you know.Regards Tim
