I think the Nelson Audio amp I mentioned above would change your mind. I've had some bad experiences with cheap Chinese gear too, so I'm always skeptical. But I really like Consonance and I like Nelson Audio. One of these times, I'll have to send you my SE8 to try. Maybe in another month or so. I'm enjoying it too much right now and I know it'd be hell trying to get it back from you and Bill.
