Subject: Re: Is there a formula to determine the frequency that a 1" throat 90x40degree horn begins to b Posted by Mike.e on Thu, 10 Mar 2005 22:09:29 GMT View Forum Message <> Reply to Message

When the mouth is big enough for the walls to control the dispersion, This will happen when more than one wavelength can fit around the mouth perimeter(?) If you inspect the polar plots of horns from JBL etc youl see in detail. Some one else can respond in more detail.
