Bill, would you say the same is true for compression drivers too. For example, the BMS 4590 vs 4592. I saw the Firenze at Replay last year, but didn't get a chance to hear them. Those double coax BMS looks very interesting.BTW, saw your "2005" 3-way at Replay today. Very nice work. Flawless integration of the midhorn into the cabinet. A lot smaller than I expected though. Any chance you can drop a note on this forum, maybe in Swap Meet, to announce new models at Replay?Gar.
