I did some frequency response on a pair of Electro-Voice t350.First both tweeters 105dB 1watt1meter everyware I've check on the internet 109dB.Now keep in mind I'm still earning this very deep tool.but as far as spl going I'm shure the numbers a correct.I'm using Praxis.I must say thoughs tweeters are really flat in there response from 4000to16k then they rolloff it looks like 6dB per octave.Regards Tim
