---

I did some frequency response on a pair of Electro-Voice t350. First both tweeters 105dB 1watt 1 meter everywhere I've check on the internet 109dB. Now keep in mind I'm still earning this very deep tool. but as far as spl going I'm shure the numbers a correct. I'm using Praxis. I must say thoughs tweeters are really flat in there response from 4000 to 16k then they rolloff it looks like 6dB per octave. Regards Tim
