I did some frequency response on a pair of Electro-Voice t350. First both tweeters 105dB
1watt1meter everyware I've check on the internet 109dB. Now keep in mind I'm still earning this
very deep tool. but as far as spl going I'm shure the numbers a correct. I'm using Praxis. I must say
thoughs tweeters are really flat in there response from 4000to16k then they rolloff it looks like 6dB
per octave. Regards Tim
