Hi all,A friend is offering me a pair of TL5050 bass horns(twin EVM-12l drivers) with or without Sentry IV-type midrange horns, sentry crossovers, and ST-350 tweets.Are these be worth hearing/buying? Can anyone comment on the sound and ideal bandwidth of the TL5050? I think they were crossed to the mid horns at about 800Hz--seems kinda high for the TL5050 to reach... I'm wondering about crossing the TL5050 to a couple of mids I have sitting around--either a JBL 2485J or one or two Dynaudio D54 mids on a large conical horn at 3-500Hz. Then I've got Radian 475 drivers for treble.Bill
