My SET amp has 8 ohm tap. It is Audio Note amp but I don't know the output impedance. I might find a SS amp to drive the bass with 200Hz crossover. The 15" bass driver information as follow:
FR=28-800Hz, 16 ohm, Fs=28Hz, Qts=0.25, 99dB/w/m, Max input power=40W, 18,000 Gauss. Thanks, Mingmingsu@yahoo.com
