Say Dave,Did you replicate the baffle of the Hawthorne Solo speaker?Or, have you built the baffle that JohnninCR has kindly offered for use with the Silver Iris?I would love to try the Silver Iris with Darell's bass augmeter driver when it is available. But, I have some resorvations about the the ability of a 15" woofer to reproduce the midrange area with quality and detail as a smaller diameter driver could that is dedicated to this region.Would you please give us a description of how you feel the quality of the midrange of the Silver Iris coaxial driver is? I know this is subjective, since it it would be based on opinion and your personal taste. But your opinion could be helpful in my search for an open baffle speaker system, like the up and coming Duet.ThanksNorris Wilson
