Hi Wayne, Depending on my Wife's mood, I'll either float around with some amps, or actually get a room, and set up my trusonic 3 way setup. Not sure yet. My guess is i'll just get an amp or two, and float around with it. Let's see. BTW, I just purchased an amp from Jef Larson, which is really cool. It uses the same output trannys he had at the last GPAF, but uses a 12b4 tube singleended, driven by a 12ax7. The sound is super clear. It's only 1 watt, but my Khorns seem to like it.
