Subject: Re: decorrelation Posted by Earl Geddes on Sat, 25 Feb 2006 01:25:22 GMT View Forum Message <> Reply to Message

Dukel was familiar with the Griesinger paper and I saw the other one but have not read it. I am not sure that the term "decorrelation" is always being used here to mean the same thing. Two sources can be uncorrelated without there signals be decorrelated.Let me read that other paper and get back on this topic.Although it may not be here since I am getting a little annoyed at all my work being discounted.
