Wayne, good question. My room is the basement and the walls are concrete. I do, however, have a trap in the first reflection points on both walls and that helps sharpen the image. One thing I have discovered is that my JBL 2426+2370 combo has much better focus than the Altec 806A+811 combo. I wonder about any diffusing effect of the fins on the 811 - scatter the sound?
