Subject: Re: Here's an interesting experiment Posted by Bill Epstein on Sat, 19 Aug 2006 22:08:15 GMT View Forum Message <> Reply to Message

Nothing was solved but the GIANT speakers put me off the puzzle! I tried the Mundorf Supreme .33 uF in the attenuation and there was very little difference between them and the Kimbers. I am about to try 10uF Obbligato oil caps from DIYHIFISUPPLY in an amplifier circuit. When funds allow I will order more plus 20uF to try back in the crossover. They're quite reasonably priced.
