I'll update the post after I update the horn. Yea, I don't want to add a tweeter or anything, actually I really enjoy the sound of it now--it's really effective, my little combe can play as loud as much bigger combos now and I've never heard a big combo as clear as mine. If I had a 4 ohm speaker, I'd run my hand-wires PTP amp through it(at least an improved version)--that's my real dream here.I'll let you know,Dan
