Hi Guys, I'm planning to buy a small sound system to connect in my small room. I'm going for a stereo system since I plan on using it only for music. I listen to lots of classical, Jazz (both calssic and modern), and quite a bit of calssic rock. My budget is quite small - around $150 for an amp and $250 for speakers. I want to know what you guys think would be the best match for my current situation. Thanks in advance, Ilan
