Here are some pictures...the speaker itself is perfect, the cone and all is intact and it plays very nicely. It looks like it may have had a tweeter as an option. Is that a crossover?? it's CAST IRON. wow. It sounds pretty full range for a single speaker, very listenable. A little more top end would be nice, but it still sounds good. Anybody seen this animal before? Any Idea how old it might be? <http://www.imagehosting.us/index.php?action=show&ident=1792959> <http://www.imagehosting.us/index.php?action=show&ident=1792961> <http://www.imagehosting.us/index.php?action=show&ident=1792963> <http://www.imagehosting.us/index.php?action=show&ident=1792964> <http://www.imagehosting.us/index.php?action=show&ident=1792965> <http://www.imagehosting.us/index.php?action=show&ident=1792967> <http://www.imagehosting.us/index.php?action=show&ident=1792969>
