Subject: The Movement of Waves and Particles Posted by Wayne Parham on Tue, 27 Feb 2007 15:02:51 GMT View Forum Message <> Reply to Message

The sound wave travels through the medium, air. The medium is made up of individual air molecules that vibrate. So both situations exist. That's the nature of the wave/particle duality, and why it can be described as having properties of both.Wave–particle dualityParticle velocityWave velocity
