I was just wondering if anyone has used the JBL 2240H 18" driver for midbass duty similiar to how the 2226 is used in the 4 pi-pro series?According to winisd I have come up with 5 cubic ft box tuned to 50hz for a -3 db @ 52hz.If anyone can comment on this I would appreciate it!Response down to approx 50hz would be required!Regards, Ron
