Hi all,Just wanted to share some info on a nice afordable, easy to use drive\horn combo using the DE250 with the RCF H100. It works nice and smooth with the crossover Wayne cooked up but lower the 6.8UF cap to 2.3 and just use an L-Pad for level matching. That's all I'm measuring 2 db down at 10Khz reference 4Khz so EQ is not needed for most people.That's all.Later,Scott
